REGISTRATION
& BADGING

Threads provide **new perspectives, new treatments of aging** in the medico-surgical spectrum. Some are acting on sagging tissues of the face creating a 3D comprehensive modification. Others more superficial are acting as skin support.

Many questions on threads are still opened and need answer on safety, efficacy and longevity.

AMWC THREADS ACADEMY training has been designed to meet the educational need of medical professionals involved in the care of patients with threads, and doctors wanting to add thread treatments to their clinic portfolio.

Aiming for **higher standards of care and better results** for the patients, this educational program will discuss:

- In depth instruction in the anatomy and pathophysiology of the face
- Scientific evidence
- Facial dynamics
- Rheology of threads
- Specific thread techniques
- Technical issues of placing threads, the entry and exit points, directional vectors...
- **Live demonstrations:** How to use absorbable and permanent threads
- Efficacy and long-term safety on threads for facial rejuvenation

LEARNING OBJECTIVES

At the completion of this course, attendees should be able to:

- Understand the concept of **cosmetic threading**
- Successfully integrate the **thread therapy** into their practice
- Know how to properly **evaluate patients, diagnose and treatment plan** to achieve the best outcomes
- Demonstrate an **improved understanding** of how to avoid, manage, and treat possible adverse reactions and complications
- Differentiate the **various approaches** to thread technique to determine that best suited to the patient
- Assess **controversial topics** in thread treatments in order to make more informed decisions

If you're considering offering thread lift treatments to patients, the AMWC THREADS ACADEMY training is not to be missed!

WEDNESDAY APRIL 3

ADVANCED COURSE IN GENITAL REJUVENATION & COSMETIC GYNECOLOGY

7:00
REGISTRATION
& BADGING

Recent breakthrough in the aesthetic field and responding to the intimate needs of men and women, cosmetic gynecology and cosmetic andrology transform appearance of intimate zones to look younger and more natural. **Different cosmetic procedures** are used to reconstruct existing defects or inadequate conditions perceived by some patients. These procedures help them to regain self-confidence and can potentially improve intimate relationship and emotional life.

Despite an insufficient documentation on safety and effectiveness and undetermined standard of practice of genital cosmetic rejuvenation, a rising number of women and men are seeking for these kinds of care and procedures.

COURSE OBJECTIVES

Training and educational sessions, live demonstrations and workshops will be run by a world class faculty of opinion leaders.

The course will provide an intensive training on invasive and non-invasive procedures in aesthetic gynecology, andrology and genital rejuvenation.

With a heavy focus on **LIVE DEMONSTRATIONS** and **VIDEO TUTORIALS** of various genital aesthetic treatments, this course will emphasize practical content that can improve your technique and skills with immediate results.

Moreover, participants will be able to watch again the live demonstrations videos on-line, after the course.

Upon completion of this module, the participants will be able to:

- Understand the idea of **different treatments and their applications**
- Review **treatment protocols**
- Perform a **competent patient assessment**
- Identify **potential complications**, prevention and management strategies
- Determine **genital rejuvenation techniques**, technology application, indications and contraindications

MONACO ADVANCED FACIAL AESTHETIC MASTERCLASS

7:00
REGISTRATION
& BADGING

In depth knowledge of **Clinical Facial Anatomy** combined with **Advanced Injection Techniques** ensure SAFE and Optimal results in Aesthetic Medicine.

The Monaco Advanced Facial Aesthetic Masterclass is aimed at high level discerning doctors in aesthetic medicine. Two modules of The Top Ten clinically relevant Anatomic Zones will be the focus of each yearly masterclass.

Periorbital region will be the focus of the morning program and **Chin & Jawline** will be covered in the afternoon.

Clinically relevant anatomy is mastered and demonstrated by top plastic surgeons who actually operate and see the **live anatomy** of facial tissues on a weekly basis. An equally eminent faculty of specialists have been selected to inject these focus zones and share the most relevant pearls and pitfalls aiming to safeguard and grow your aesthetic practice.

Carefully selected models with challenging features within the focus zones are selected with emphasis on cultural, ethnic and gender variations.

The lecture topics will be put into practice in the live show where paired injectors will have ample time to discuss surface anatomy, choice of filler and toxin, mode of injection, precautions and after care.

Aesthetic Medicine and "Anatomical Sculpture" are inseparable. The aesthetic doctor must assess and perform volumetric facial corrections with the sculptor's skills and manner.

"Fredange", an anatomist sculptor, will perform in this session an impressive **"LIVE"** demonstration allowing a better understanding of the subtleties for a successful facial aesthetic treatment.

Through clay modelling, the sculptor will show the key points on the same face to underline the differences between man and woman and by turning the female into male face. With Fredange's skillful hands, the effect of aging process will be directly visualized and then analyzed.

9:00 IMPROVING FILLER PLACEMENT – ARE YOU WHERE WE THINK YOU ARE ?

10:30 LIVE INJECTIONS AND LIVE ULTRASOUND ANATOMY - FULL FACE

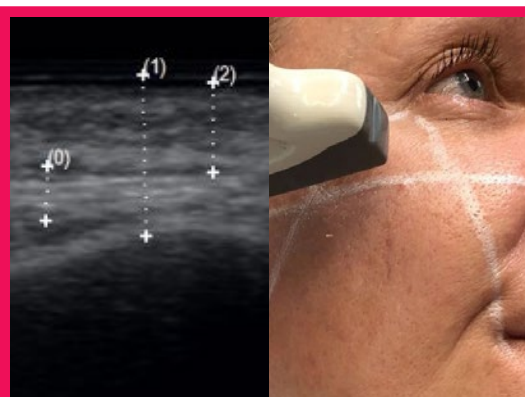

CHAIR: Kate GOLDIE, Daria VOROPAI

One of the main challenges we face when injecting the full face with soft tissue fillers is how to be sure we are really placing the gel in the tissue plane that we are aiming for. This is especially true and important when injecting areas of the Face such as tear trough with a cannula for example, here correct placement will mean aesthetically pleasing results which last, incorrect placement can lead migration, unevenness and a puffy peri-orbital area.

This session is a **live injection session where we inject some of the most challenging areas of the face** - such as teartrough , forehead, noses, mid face and analyse how we can improve our the safety and efficacy of our techniques by making sure we target the correct tissue plane.

Speakers and Injectors:

Kate GOLDIE, UK - Daria VOROPAI, UK - Simon RAVICHANDRAN, UK - Tingsong LIM, Malaysia
Henry DELMAR, France - Kathryn BARNES, UK

Ultrasound will also show the reality of where major vessels are running in our live patients and how close our filler injections are to these vessels on the patients. For each live injection session we will ask our expert injectors to show and describe what it feels like, and what it looks like to be in the correct tissue plane and then we will examine with the cutting edge high frequency ultrasound where the gel is really being placed. This live injection and live anatomy using Ultrasound aims help us to become more confident in filler placement and improve our safely and outcomes for our patients.

Alternative to a surgical lift, threads become an easy option for face/body contouring, lifting and shaping. When placed under the skin, they can be used to tighten and volumize areas of the skin that are loose or sagging.

The procedure is becoming more popular than ever! THREADS LIVE SHOW at the AMWC 2019 will explore a variety of thread lift approaches from the leading specialists in this domain.

This panel will also offer a unique opportunity:

- to meet the world-renowned thread experts and observe them treating patients on stage
- to see the most efficient techniques
- to discuss the technical issues of placing threads, the entry and exit points, directional vectors...
- to learn about the efficacy and long-term safety on threads for face and body rejuvenation
- to improve the experience required to deliver these treatments in aesthetic practice

- Introduction: Do threads have a role in aesthetic medicine?

12:00 NAVIGATING THE NEW HORIZONS OF AESTHETIC DERMATOLOGY IN ASIA
13:00

This symposium is a preview of the fascinating event AMWC Asia-TDAC 2019. It is brought to you by Taiwanese Dermatological Association (TDA) and dedicated to those who wish to learn about the latest updates of aesthetic dermatology in Asia.

This one hour symposium will navigate the application of artificial intelligence in practice, picosecond laser which works particularly well in Asian skin, cutting edge techniques in injectables and finally Demodex, an overlooked skin infestation easily mistaken in aesthetic practice.

The attendee will be able to learn from the **latest advancement of artificial intelligence** in aesthetic field and how the commercially available devices possibly assist in the practice.

Picosecond lasers seem to work extremely well in Asian skin with low incidence of PIH. The science behind will be unveiled by a pilot study using harmonic generation microscopy.

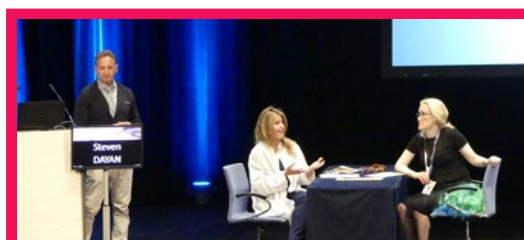

How to manage the difficult situation of tear trough with eye bags? The author of a published technique will guide you in a step-by-step fashion.

A correct diagnosis is halfway to success. Demodex, an overlooked skin infestation, could cause some confusions in aesthetic practice. Getting to know this old friend of skin will provide new insights in skin care and avoid pitfalls in aesthetic treatment.

15:30 **LIVE DEMO**

The not ready for "Prime Time" players return! **You DO NOT want to MISS THIS!**

Have fun with our Golden Globe players who return to act out everyday scenarios touching on the weakness and strengths of all aesthetic doctors. Our players along with audience participation will take an unapologetic and raw look into 5 real life situations that surface each day in all of our clinics.

Our players promise to be honest, exposing the fears and vulnerabilities of Type A physicians managing and dealing with the most current burdens of the day. From disgruntled patients to unhappy staff. From financial goals to neglected personal lives. From practices that are too busy to those that are too slow...we present our most meaningful concerns and how we managed them. Could we or should we have done something differently? Let's decide together... All in attendance are encouraged to bring their most difficult situations as we play them back and together explore solutions.

We promise this will be one of... if not the most fun and valuable session of the conference.
